

# Sherdley Primary Science Newsletter Autumn 2

Welcome to our Science Newsletter. for Autumn Term 2023

The children all over school have been extremely busy this term engaging in a variety of activities.

Lets have a closer look at some of the things Year 1 and EYFS have been up to:

Recently, our Pre-school children have been out and about investigating the changing seasons. They really enjoyed their ice walk and looked closely at how the cold was changing their environment.

In Reception, children have been investigation shadows and even making their own snow!

Year One have had a visit from the Zoo Lab and got up close to some amazing creatures.

## Scientist Spotlight

Next term we will be spotlighting scientists both past and present.

Our first scientist is Jane Goodall a primatologist and anthropologist. She has spent 60 years studying the social and family interactions of wild chimpanzees.

As a pre-schooler, she enjoyed spending her time observing animals.

You could have a go at observing and helping animals in your own environment with your children. You could build a hedgehog den or leave out food to help feed them in the winter. Make bird feeders or fat balls to attract wild birds to your garden and get out your binoculars and spot the different varieties that visit you.
