Times Table Rockstars

TT Rockstars is an application we use at Sherdley for maths based challenges and games. These maths challenges are based around times tables and will help teachers see how students are improving in the subject or where they made need some extra support.

Teachers are able to do a "baseline" grid which is a 10 by 10 grid of times tables that students will have 5 minutes to complete. This measures their response time to multiplication based questions.

Students are able to click the "play" button to do singleplayer or multiplayer times tables practice. In this mode students can earn coins based on the amount of answers they get correct. These coins are a reward that they can use to customize their avatar in many different ways.
